News of the Morning. Both branches of our State Legislature are or ganized and at work. The Message of the acting Governor was delivered yesterday. Neither the New York Assembly, nor the House of Representatives, has yet succeeded in electing a presiding officer. Some fearful marine disasters have been occasioned by the late storm on the Atlantic scaboard. The Democrats of New York, in convention assembled, have resolved against slavery agitation, (and in favor of dampting the Niagara,) endorsed Pierce and Nebraska, and pronounced a enlogy upon the lete lamented Whig party. The weather is moderating with

symptoms of snow.

BASHFORD.

Mr. Barnton's Message. The message of the acting Governor of the State was communicated to the Legislature yesterday afternoon, and will be found in our colour this morning. Advance copies were furnished to some of our contemporaries who onjoy a larger measure of Ex-Governor Barstow's fator then the Sentinel does, and we are indebted to the News & Free Democrat for the use of their type The length of the message precludes all extended

THE FRACTES OF THE CANTASS -We invite the earnest attention of our readers to the statement embodied in the letter of our associate at Madi son, relative to the atrocions and wholesak tounds he which W. A. Rammow was countrel nto the Office to which the People elected Cours

The Assaults on the Chief Justice. The Madison Argus and Democrat, the "official State paper" and recognized organ of the Barstow Administration, continues, from day to day, its vindictive and intemperate assaults upon Chief Justice Witten, for the imputed offence of House is organized and ready to proceed to best administering the oath of Office to Governor

The Argus accuses the Chief Justices of taking sides in the question at issue, and | serted in place of Barston. does not scruple to ascribe to him the lowest pretizan motives. We quote a partion of the organ's language that our readers may see to what extremities it stoops, in this concerted warfare upon an honest and upright Judge:

The act, however, is a monument of the de-banchery of the party—of the invasions by parti-zan feeling of the courts, and how few restraint exist around even the most respectable function aries, in prospect of a speedy termination of offi-We will not follow this part of the subject

But will Judge Whiton, if the thee threater one was sugge winton, if the Greenbreaker of by Mr. Bashford ever comes to trial, six in judgment upon it? What view will be take of his duty, after his part in the stapid, but not less misobevious because stupid, faire enacted by Mr. Bashford. He has in effect, amounced, upon the strength of newspaper seemal and pubnic grossp, that he deemed Mr. Bashford entitled to assume the oblisations of the office of Greenbreaker. gossip, that he defined art. Desired control of seven nor. How does this fit him to sit in impartual judgment on the merits of the contest? With u^rdic justice and public decency obtain from hun hereafter a degree of regard superior to that shown in swearing in Mr. Bashford?

The sole charge against Judge Whitek is, that when Colles Bashford, claiming to be the legally elected Governor of Wisconsin, desired to qualifu, the Unief Justice, at Mr. Bashronn's request, administered to him the oath of office. He had been requested and had consented to do the same thing for Mr. Bare-row, thus accordingly avoiding all appearance even, of judging between them. But when Mr. Banstow lemmed that the Chief Justice had sworn in Gov. Bastroup, he wrote the Judge a curt note, declining his services, and sent for Judge Collins to obeliate in its stead. The Arous and Mr. Barstow, it appears, insist that the Chief Justice, before swearing in Cov. Basirono, should have examined his title to the office which he claimed. In other words they desired him to ore indust the year search which is to come before his court, and because he refuser to do so, and reserved his opinion and decision till the case could be properly heard, they areai and traduce him in the coarsest terms. The Chief Justice has taken no side, has int mated no opinion, has given no judgment in this contested question. His administering the eath to Gov. Basurono was a ministeriol, not a judicial act, which he could not refuse to perform without prejudging the case. How utterly inexcusable ! therefore, are these envenomed attacks upon a man whose integrity is proverbial throughout the State, and whose character lends lastre to the Supreme Bench.

Mr. Knowlton introduced a resolution calling port of the Secretary of State, an estimate of e amount probably necessary to be drawn The latter amount is stated at \$274,044 50, which it is proper here to add, includes the unpaid appropriations of the session, amounting to \$91,003 12, the re-imbursement of the Treasby for over payment on account of General and \$13,64608, and every other probable lia-

This also includes estimate for the comstates in the difference of the main building of the Penitentary and the prohable additions to the buildings for the Blind and Deaf and Dumb Asylum. To meet with limbilities, the resources are lated as follows:

Jan'y 1, 1850 \$138,432 04 Here, it will be seen, is a prospective surplus of \$123,432 04, of which amount \$100,000 will unquestionably reach the Treasury during the present year. For what purpose a State Tax of arer \$250,000 00 was levied by the last Lexni over \$220,000 to was fevered by the hard riskature. I have never been able to understand, unless it was with a ricey to create partizon clamor for political ends, which, to all conversant with the history of politics in this State during the past year must seem, at least, quite

probable That the people should be required, for such objects, to pay an unnecessary amount, is wrong in the extreme, and in violation of the established principle "that all moneys not remired for the current expenses, should remain in the hands of the people." The hill providing for this tax, it is true, received my approval; but it was under circumstances renderin it imperative, owing to its passage just upon the very close of the session, and too late to the very close of the accision, and too late to secure action upon another and more appropriate one, had I seen proper to clurg it without my sanction. Under the circumstances, I regarded it far better that the bill should become a law, than that no law of its character should be passed, to the neglect of that provision of our Constitution which is as follows: "The Tacksharms shall provide or an annual tax sats. egislature shall provide for an annual tax sofficient with its other resources, to defray the ostimated expenses of the State for each year."
The School and University funds under the charge of the Board of Commissioners, provided by the Constitution, have, as will be seen

add by the Constitution, have, as will be seen by the Constitution, have, as will be seen by the Constitution, have, as will be seen by the Constitution of Report, been largely incroased within the past year. The aggregate principle of the school fund as the 31st of Dec. was, \$4,897,269 30, and of the University fund \$181,876 10, showing an increase of the former, a the year 1855, of \$227,010 53, and of the later during the same period, of \$29,729 49.— This is an oridence of the energy and bidelity with which the management of the educational funds of the State has been conducted.

It will be seen by the Secretary's Report, that the accumulated interest on account of the school fund since the last annual apportionment amounts to \$17,476 98. This added to the amount due and payable prior to the 10th day of March next, all of which, if collected, will be then subject to apportionment by the State Superigiandent to the various common schools, makes a total of \$150,276 83.

In my last annual message I stated that it was intended to propegute the survey, north of the Wisconsin River to the Copper mines of Lake Superior. Owing to the length of time, however, necessarily employed by the Geologist in the more settled portions of the Rate, he found himself anable to carry out his intention in this respect, and was obliged to forego the visit to the Superior country, until another season, when that region will be examined by him. An attentive permal of his report will exhibit to you much of the valuable information which his experience and examination has enabled him to gather since submitting his former communication upon the same subject.—

In my first annual message I took occasion

In my first annual message I took Occasion to urge upon the Legislature, not only the propriety buff the nisolute pecessity, there existing for the erection of a State Lunatic Assign.

During the session which had their commenced, During the session which had then commenced, an act was passed for that purpose, under which the site was procured, and a contract was entered into for the necessary buildings, in accordance with the plans adopted by the commissioners in charge. In my succeeding message the subject was again brought to the notice of the Legislature, and while it was urged that any shall any winder for forwarding.

motice of the Legislature, and while it was urged that saitable provision be made for forwarding the work, the way to provide the means therefor, was, as I judge, clearly pointed out.

That Legislature seemed to utterly disregard the importance of such an institution, and the urgent, nedessily for jig creetion, and instead of endeavoring to adopt the means proper for jits advancement, appeared to seek only income a command, which might retard its progress; and in a very heaty manner proceeded to repeal the law under which the work had been commenced in whice at the same time no adoquate provision. making at the same lime no adequate provisions for discharging the liahilities of the State already incurred. The plans adopted for the buildings to be erected, were then and are still considered to be more nearly perfection any considered to be more nearly perfections any other yet proposed for an institution of that character; being the same which several of the States have adopted for such purposes, and which have been approved by the experience of the most empirely bersons who have made the proper (reatment of the insane their special study.

A for greater necessity exists now than it did then for the prosecution of this important work. The ceases returns of June, 1855, show that there was at that time in the State, the number of two hundred and forty of that unfortunate class which the Institution was designed to relieve. The number of those thus entitled to our sympathy and assistance is constantly increasing, and the condition of each one so afflicted, daily becoming more happiness. The same that the condition of each that the first class has the the same, and urging Congress either and their claims upon the Legislature tensor. atudy.

A far greater necessity exists sow than it did then for the prosecution of this important work. The census returns of June, 1855, skow and their claims upon the Logislater consequently more argent. It must be borne in mind, also, that the number of this class has

freferred to, as expressing the opinion I still entortain, not only with regard to the necessity existing for the erection of such an Institution, but also as the means which may properly be employed for that purpose. Notwithstanding the law of the last cession was intended to probect these lands against freepass and waste, there have been extensive depredations commit-ted and great quantities of timber, which con-stitutes the chief value of a great portion of the

friends, is idle, and unterly unworthy the countenance of honorable men. Officers thus, entrusted should, and no doubt do, leel na 'obligation' resting upon them more secred and binding than the accomplishment of mere, personal or political objects. The bestowal of fastowal of fastowal or political objects. The bestowal of fastowal of fastowal or political objects. The bestowal of fastowal of fastowal or political objects. The bestowal of fastowal of fastowal or political objects. The bestowal of fastowal of fastowal or political objects. The bestowal of fastowal of the same, and whatever party or sect may succeed in obtaining this power, the same policy may with entire confidence, be expected to be pursued. It is, however, true, and will be so found upon examination, that not a few who are neither personal nor political friends of the officers who have had these funds in keeping have received accommodations by loans made in confirmity with the law.

By reference to the Report of the Saperint endent of Public Instruction it will be perseived that the important education interests of the State are progressing in a manner linghly salisfactory to those who attach to them their true value. It is gratifying to know that the linsing establishment of our common school system, is steadily working out the beneficial result intended, and promises to continue for the law as extended the account of the purpose of ensuring the linsil granted for the purpose of ensuring t emor to receive the same at any price. The State realizes nothing under the operation of this law, as there is no existing provision for their sale, and if amounts in effect simply to a license to the pro-emptor to commit such waste upon the land as he may see fit.

upon the land as he may see fit.

The Institutions established for the Blind and Deal and Dumb, are in their usual prosperous condition and deserving the continuance of Legislative favor. For more defaulte information concerning their condition and wants limits of this communication forbid a more particular reference.

Total amount of circulating notes outstanding on January 1st. was \$1.153,534, of which \$477,063, was issued in the year 1855, and during which time the sum of \$251,121 was returned for cancelliation. The Fox and Wisconsin Improvement Company, although not required by any law to submit an annual report, have seen proper, in view and their operations, to fornish information which appears to be of sufficient importance to the same to justify me in laying it before you.—

Since the company took possession of this ratuable improvement it appears that they have expended nearly \$600,000 in forwarding the work, providing boats and fixtures, and paying the debts resting against the same when they took possession of it. They have been followed in associating men of capital and high standing with them in this enterprise, by which means the early completion of this improvement is rendered certain.

From Green Bay to Lake Winnebago it may

From Green Bay to Lake Winnebago it may indeed be said that the work is about completed. This section was very properly regarded, as the commencement, as the great burthen of the whole undertaking. Surveys of the Upper Fox river, and of the Wisconsin below the legitage Canal, have been made and preparations perfected for opening the successful navigation of the Wiscissinpir river, during the present year. The liabilities growing out of and Jonnected with this work, which at one time threatened to become a birthien upon the State, have been mainly cancelled. Thus the State has been relieved from such liability and the engagnent annoyance in managing a public work of great magnitude, and secures the advantages of one among its most important internal improvements with its wast natural tributaries, while at the same time those whose capital and enterprise have secured its completion, must repainly rean arich reward.

tainly reap a rich reward.

The foctaring care of the Legislature should be extended in every constitutional and proper manner toward those enterprises which are caculated to benefit the whole State, by the opening of communications between different points within it, and is a sensequence, in reficuous ways, adding to its wealth and resources. Experience has shown the wonderful advantages intimately connected with our railroad system, although still in its infancy; and it is incumbent upon the Legislature to keep alive a sense of security, so far as its own action may tend to do so, in those was cantrol 'lies in here, or 'acc's abroad, as may be interested' in 'their 'permainence as a secure means of investment. All Legislation which, by interfering with charter. tainly resp a rich reward. do so, in more who destrot them here, or such abroad, as may be intersetial in their plermainence as a secure means of investment. All legislation which, by interfering with chartered rights, or by whatever means, a same of insecurity is induced, is unwise, as having a direct tendency to deter capitalists from commencing those very necessary improvements, which out which we would be comparatively isolated, and is unjust because it interferes with rights already guaranteed by the State, and by which action individuals may become sufferers. I regret that I have not more extensive statistical data at command, by which the rate of increase in the business of the reads now in operation in our State, could be accurately exhibited. From such as I have been able to obtain I am satisfied that, during the past year, it has been nearly fifty per cent, in the amount of legitimate business yielding receipts. Those now in operation in our State, although their cost of construction is but modarate compared with most eastern reads yield, as has been ascertained, far greater net earnings in proposition to their extent.

their extent.

This is gratifying, and not only furnishes strong assurance of the safety of such investments in our State, but affords ample grounds for the opinion, that every legitimate enterprise of the character referred to, with in consequence, be ultimately carried forward to some That this will be the result I am continue. pioton. That this will be the result | am copinion, provided the Legislature does not throw unneccessary obstacles in the way, or engender a feeling of insecurity in capitalists by reckless Legislation or direct interference with chartered rights.

Mr. Baratow's Message.

The message of the acting Governor of the State was communicated to the Les dature ves this morning Advance copies were furnished to some of our contemporarie) who onjoy a liger measure of Ex Governor Barston s favor than the Sentinel does, and we are muchted to the News & Free Democrat for the use of then type The length of the message precluce- all extend d comment this morning. It is the production (a bitter, narrow minded and unprincipled parts can, and utterly unworthy, in its spirit and lan guage of even a Pretender to the Executive

THE FRAUDS OF THE CANYASS -- We myste the carnest attention of our readers to the statements embodied in the letter of our associate at Madi son, relative to the atrocious and wholesale franks by which W A Bararow was coun al nto the Office to which the People cheefed Corre

The Assumits on the Chief Inside.

The Madison Argus and Democrat the "offiend State paper and recognized organ of the Barstow Administration, continues, from day to day, its vindichie and intemperate assaults upon Chief Justice WRITON, for the inspute I offence of administering the oath of Office to Governor BASHFORD The Arous accuses the Chief In tices of taking sides in the question at issue and does not a ruple to ascribe to lum the lowest per tizan motives. We quote a portion of the or gan's language that our readers may see to wha extremuses it stoops, in this concerted waifaic upon an honest and upright Judge

The act however is a monument of the de lengther of the party—of the invasions by part and feing of the court, ind how few re treat cust around even the most respectable functionaries in prospect of a speedy termination of official power and an ownweating desire to continue its exercise. Judge Whiton is looking for a rechection at the hands of the party which recently supported Mr. Exciting and which now exerts his heutique claims to the office of Governments. the his hermous claims to the office of Governor vil not follow this part of the subject

But will Judge Whiten if the cose threaten ed by Mr. Breshford ever comes to trud sixth judgment upon it? What true will be take of the duty, after his part in the simple, but not less insofterious because stupid faces enacted by Mr. Breshford. He has in effect unconneed, upon the strength of newspaper seandal and public posses that he deemed Mr. Breshford entitled to a sume the obligations of the office of Govern. How does this fit him to set in impartial judgment on the merit of the conket? Will public usure and public decency obtain from him hereafter a degree of regard superior to that hereafter a degree of regard superior to that shown in swearing in Mr. Bushford

The sole ob age against Judge Whiten is, that when Coles Baskroke theming to be the legally elected Governor of Wilconsin, desired to qual fu, the Chief Ju nice, at Mr Basmorn's requi administered to him the oath of office. He ind been requested and had con ented to do the same there for Mr. Barston, thus scrupulou v avolding all appearance even, of judging between them. But when Mr. Barstow learned that the Chief Justice had sworn in Gov. Basicrop he wrote the Judge a curt note, dechain, his servi ces, and sent for Judge Courts to officiate in or stead. The Arms and Mr Barstow, itappears, ment that the Chief Justice, before swearing in Gov Bashrone should have examined his it! to the office which he claused. In other word they desired him to prejudge the very case which is to come before his court, and because he refuse? to do so, and reserved his opinion and decript bil the case could be properly heard, they went and traduce him in the coarsest terms. The I had Justice has taken no side has intimated no opinion, has given no judgment in this con tested question. His administering the oath to troy Basurone was a manistered, not a nud call act, which he could not refuse to perform nell o ! prejudging the case. How utterly inexcusable not one igainst the re-clution, even if his me therefore, are these entenomed attacks upon a man who-e integrity is proverbed throughout the Legislatine ought to adoun till the question is State, and whose character lends lustre to the Supreme Bench

York City to M ss JE/NY WING of the city 2 Section 3, Article 4, of the Constitution required the Legislature to provide by law for the enumeration of the inhabitants for the State in the year 1855. The law passed in pursu mee thereof evidently failed to accomplish the full object intended, judging from the total census ratures, which show the aggregate population in the first of June to have been 852 100. At though this result exhibits an increase in population, that is, at least, very flattering, being a gain of nearly 250,000 since 1850, yet it is probable the number of inhabitants in the State on the first day of June was at least 50 000. of the market unchanged. a gain of nearly 200,000 since 1800 yet it is probable the number of inhabitants in the State on the first day of June was at least 50 000 more than was returned. At the time it was a gource of regret with me, 23 it has eyes since facin, that the law did not make more efficient provision for the enumeration of the inhabit anis togather with some provision for the collecting of statistics concerning our manufactures, products and general resources, as these would have furnasted proof of our increasing prosperity, and formed valuable data upon which to base many useful calculations.

By the same section of the Constitution it was made your duty at the present vession to apportion and distinct show the members of the Senate and Assembly, according to the number of inhabitants shown by the census. The Constitution fixes the maximum of the Assembly at one hundred members, and of the Senate at not more than one third, nor less than one fourth of the number of the Assembly. In my judgment, the present number in each honse is an ample for all our wants until the expiration of five years, at which time, the Constitution provides for again re districting the State That evan a smaller number than at present is allowed would quite as well subserve the interests of the people. I am firmly convinced. allowed would quite as well subserve the in terests of the people, I am firmly convinced, as the tendency would be to lessen the length of the sessions and more definitely fix the responsability upon individual members—thereby en

auring a greater regard for the consequences of their acts, and more careful deliberation in fra imag them.
